

CAT BOHANNON

Eve: How the Female Body Drove 200 Million Years of Human Evolution by Cat Bohannon (Seattle, WA)

Bohannon surveys more than 200 million years of evolutionary history and asks: where are the female bodies? The result is a deeply rigorous and witty corrective to the way we view the role they have played in the development of tools, body parts, and brains. *Eve* delivers something genuinely, brilliantly new and sets the standard for how we talk and think about our species.
